

The App Name — Direction & Shortlist

Renaming the calorie + macro + AI-photo + workout tracker · July 2026

You didn't build a tracker — you built a **reason to stay focused**. Dieting is boring on its own; what makes the discipline worth it is having **one clear thing to aim at**. The app is that aim — simple enough for a beginner, motivating enough to keep the fire lit.

fitness + nutrients → energy · focus · ember

The naming move: don't name the *inputs* — a “FitNutri” mashup is exactly the bloated feel you're avoiding. Name the **output**: the *vital energy* you earn from eating well and training. Real words already mean this — **vim** (vigor/energy), **verve** (zest for life), **élan** (life-force) — paired with your **ember** instinct (the fire that keeps you going).

SHORTLIST — ALL APP-STORE-CLEAR, DOMAINS FREE

★ Embero	The ember / fire you described — the energy you earn — and it keeps your existing coral-ember ring, so the logo barely changes. Holds both your <i>fire</i> and (via icon + tagline) your <i>aim</i> .	emberoapp.com getembero.com
Vervo	verve = vital energy + zest for life — literally fitness + nutrition → energy in one premium word.	getvervo.com joinvervo.com
Vimly	vim = vigor from a nourished, fit body; the soft ending says “simple, for anyone.” Warmest + most beginner-friendly.	getvimly.com joinvimly.com
Elano	élan vital = the life-force; premium and meaningful.	elanoapp.com getelano.com
Thriva	thrive — the flourishing that comes from health.	thrivaapp.com getthriva.com

TAGLINE (YOUR EQUATION, IN THREE WORDS)

Nourish. Train. Ignite. nutrients + fitness + ember · alt: “Fuel the body, light the fire.”

THE DECISION COMES DOWN TO TWO FEELINGS

Embero Fire front-and-centre; keeps the identity you already have. Emotional, warm, ownable.	Vimly / Vervo The word <i>itself</i> means “the energy of a fit, nourished life.” Vimly = warmest/simplest, Vervo = most premium.
---	---

ICON DIRECTION

An **ember-lit arc that sweeps up and lands a dot on a point** — reading as a spark/flame **and** a macro progress-ring & an arrow hitting its aim, all at once. Animated: the arc glows in on launch and the dot “arrives” with a soft settle. Evolves the coral ring you already have — memorable, warm, unmistakably not “just another macros app.”

Method: coined candidates filtered by the Apple App Store search API (exact-name collisions removed) and live DNS domain checks. **Reality:** every pronounceable exact .com is parked by domainers — secure a modifier domain now, buy the exact one later if desired. **Still to run on the chosen name:** Google Play + a formal USPTO / EUIPO trademark search.
